

Launch QRA and follow the intercept

Quick Reaction Alert - check the launch, intercept and return.

GAME v0.8.16.0 / ENGLISH

☐ 01 Check the contact and tension

Check the contact's track number, identity and TS (tension state). Quick QRA normally requests IDENT; at Critical TS, H (Hostile) can trigger ENGAGE. Check ACTIVE OPS for fighters already assigned.

☐ 02 Open the launch choices

Left-click the intended contact and recheck its track number. Finish text entry, close the Escape menu, and finish or cancel any other target selection. Press Space (default) and check that QRA LAUNCH OPTIONS opens.

☐ 03 Choose and confirm the force

Compare BASE, DIST, AVAILABLE and ETA. Choose a base and Singleton (1), 1 Pair (2) or 2 Pairs (4), then click LAUNCH QRA. If Availability changed appears, review the revised force before confirming again.

☐ 04 Follow preparation and departure

Open ACTIVE OPS with G (default) and read ASMA, the message window. A QRA Pending row can show T- or Rolling before the flight appears. If the row is absent, check existing flights and messages. Pending or Rolling is not proof of take-off.

☐ 05 Follow the correct intercept

Match the callsign and target in ASMA. TALLY reports visual contact. JUDY reports the fighter taking control of the intercept; it is not identification or permission to fire. Read the identification report.

☐ 06 Check every fighter's fuel

Read each fighter's F (fuel) and task in ACTIVE OPS. Plan refuelling or a return in time. JOKER and BINGO warnings do not guarantee enough fuel to get home.

☐ 07 Follow the return to landing

Right-click your fighter and choose RTB, or use its RTB button in ACTIVE OPS. Check each group member's return task and landing. Check base availability and supplies before another launch.

KEEP IN MIND

Read refusals and partial/unarmed-launch warnings. AVAILABLE does not promise full fuel and weapons. CANCEL closes unconfirmed choices. CANCEL on QRA Pending cancels a waiting launch; it does not recall airborne fighters.

Orders can affect the launch group. Training may control the sequence; check the actual tasks.

Missing ACTIVE OPS row? Click each highlighted IDENT and TASK badge again to clear the filters.
